

INDEX

Program No.	Programs	Page No.
1.	Program to Create the equivalent of a four-function calculator. The Program requires the user to enter two numbers and an operator. It then carries out the specified arithmetical operation: addition, subtraction, multiplication or division of the two numbers. Finally, it displays the result.	1-2
2.	Program to input a character and to print whether a given character is an alphabet, digit or any other character.	3
3.	Program to calculate and print roots of a quadratic equation $ax^2+bx+c = 0$ ($a \neq 0$).	4-5
4.	Program to calculate area of a circle, a rectangle or a triangle depending upon user's choice.	6-8
5.	Program to calculate the factorial of a positive integer.	9
6.	Program to search for a specific integer in a 1-D array (Linear Search).	10-11
7.	Program to count the number of employees earning more than Rs 1 lakh per annum. The monthly salaries of 20 employees shall be provided by user.	12-13
8.	Program to add two matrices.	14-15
9.	Program to read Sales of 5 salesman in 12 months and to print total sales made by each salesman.	16-17
10.	Program to calculate grades of 4 students from 3 test scores.	18-19
11.	Write a program that takes a string as input and outputs the reversed string. For example, if the input is "Skillarger", the output should be "regallikS".	20
12.	Write a program to count the number of vowels and consonants in a given string. For example, for the input "Computer", the output should be Vowels: 3, Consonants: 5.	21
13.	Write a program to check whether a given string is a palindrome. For example, "level" is a palindrome, but "hello" is not.	22-23
14.	Write a program that removes duplicate characters from a string. For example, if the input is "programming", the output should be "progamin".	24
15.	Write a program to find the longest word in a given sentence. For example, for the input "C++ is a powerful programming language", the output should be "programming".	25
16.	Program to read values into a nested structure.	26-27
17.	Program to store information of 10 employees and to display information of an employee depending upon the employee no given.	28-30
18.	Program to accept and print a student's result using a structure having array inside it.	31-32
19.	Program to illustrate passing of structures by value.	33-34
20.	Program to illustrate passing of a structure by reference.	35-36
